Science Fair Presentation Questions

1. Where did you get this idea?

2. How did you come up with this title?

3. What research did you do?

4. What was your hypothesis?

5. Why did you think that would happen?

6. What were your independent and dependent variables?

7. What was your control?

8. What did you measure and how?

9. How did you calculate that result?

10. Why did you choose that amount, (or measurement, or piece of equipment, etc.)?
11. How did you replicate the experiment?

12. What does that graph tell you?

13. How variable were your results and what might explain the variability?

14. What did you base that conclusion on?

15. Why/How are your findings important?

16. Who might want to know this information?

17. What would be the next experiment you would do?

18. What was the hardest part (or most fun, or most exciting, or most surprising, etc.)?

19. Who helped you?

20. If you had to do it all over again, is there anything you would do differently?
